/pc2mm/src/usscalc.h

```
graph BT; A["U:/ICT/7th_semester  
/bpri2/code/myEthernut  
/pc2mm/src/main.c"] --> C["U:/ICT/7th_semester  
/bpri2/code/myEthernut  
/pc2mm/src/usscalc.h"]; B["U:/ICT/7th_semester  
/bpri2/code/myEthernut  
/pc2mm/src/usscalc.c"] --> C;
```

The diagram illustrates a file dependency structure. At the top is a gray box containing the path to a header file: `U:/ICT/7th_semester/bpri2/code/myEthernut/pc2mm/src/usscalc.h`. Below this box are two white boxes. The box on the left contains the path to a source file: `U:/ICT/7th_semester/bpri2/code/myEthernut/pc2mm/src/main.c`. The box on the right contains the path to another source file: `U:/ICT/7th_semester/bpri2/code/myEthernut/pc2mm/src/usscalc.c`. Two blue arrows point from the bottom of each white box to the bottom of the gray box, indicating that both `main.c` and `usscalc.c` include `usscalc.h`.
